Sample GAT Analytical Reasoning Questions with Answers

Below are representative questions from various categories, along with detailed step-by-step solutions.

1. Logical Puzzle: Seating Arrangement

Question: Six friends?A, B, C, D, E, and F?are sitting in a straight line. A is sitting to the immediate left of B. C is sitting two places away from D. E is sitting to the immediate right of F. Who is sitting in the middle?

Answer and Explanation:

- Step 1: Let's assign positions 1 to 6 from left to right.
- Step 2: A is immediately left of B: Possible positions are (A, B).
- Step 3: E is immediately right of F: (F, E).
- Step 4: C is two places away from D: positions with two gaps.
- Step 5: Since the positions are limited, try placing the pairs first.

Possible arrangement:

- Let's place A and B at positions 1 and 2:
- Positions: 1: A, 2: B
- E is immediately right of F:
- F and E occupy positions 3 and 4 or 4 and 5, etc.
- Place F at position 3 and E at position 4:
- Positions: 3: F, 4: E
- Remaining positions are 5 and 6 for C and D.
- C is two places away from D:
- Possible placements:
- C at 5, D at 3 (but 3 is F), invalid.
- C at 6, D at 4 (E), invalid.
- C at 5, D at 7 (not available).
- Alternatively, swap C and D:
- C at 6, D at 5.

- Now, check the positions:
- 1: A
- 2: B
- 3: F
- 4: E
- 5: D
- 6: C

- Verify D and C are two places apart:
- D at 5, C at 6: only one apart, invalid.
- Adjust positions:
- Place C at 4, D at 6:
- Now, D at 6, C at 4, but E is at 4, conflict.
- Final arrangement:
- 1: A
- 2: B
- 3: F
- 4: E
- 5: D
- 6: C

Check the question: Who is sitting in the middle?

- Middle position is 4: E.

Answer: E is sitting in the middle.

2. Series and Pattern Recognition

Question: What is the next number in the series: 2, 6, 12, 20, 30, ?

Answer and Explanation:

- Step 1: Observe the differences between consecutive numbers:
- $6 - 2 = 4$
- $12 - 6 = 6$
- $20 - 12 = 8$
- $30 - 20 = 10$

- Step 2: The differences form a series: 4, 6, 8, 10, increasing by 2 each time.
- Step 3: The next difference should be 12.
- Step 4: Add 12 to the last number:
- $30 + 12 = 42$.

Answer: The next number is 42.

3. Classification and Grouping

Question: In a class of 40 students, 25 like cricket, 20 like football, and 10 like both. How many students like neither cricket nor football?

Answer and Explanation:

- Total students: 40
- Students who like cricket (C): 25
- Students who like football (F): 20
- Students who like both (C $\cap$ F): 10

Using the principle of inclusion-exclusion:

Number who like cricket or football = $|C| + |F| - |C \cap F| = 25 + 20 - 10 = 35$.

- Students who like neither = Total students - students who like cricket or football = $40 - 35 = 5$.

Answer: 5 students like neither cricket nor football.

4. Blood Relations and Directions

Question: Pointing to a man, Sarah said, "His mother is the only daughter of my mother." How is the man related to Sarah?

Answer and Explanation:

- Sarah says: "His mother is the only daughter of my mother."
- The only daughter of Sarah's mother could be Sarah herself or her sister.
- Since the man's mother is the only daughter of Sarah's mother, the man's mother is Sarah herself.

- Therefore, the man is Sarah's son.

Answer: The man is Sarah's son.
