Historical Context and Development

Triumph's Revival in the Late 1990s

In the 1990s, Triumph was primarily known for its classic Bonneville models, but the brand sought to re-establish itself in the high-performance sportbike market. Thanks to its lightweight frame and responsive suspension, the Daytona T595 offers exceptional handling. It exhibits agile cornering, quick turn-in, and stable high-speed stability. The seat height of approximately 785mm (around 30.9 inches) makes it accessible for a wide range of riders, while the weight distribution ensures balanced handling.

Comfort and Ergonomics

While primarily designed as a sport bike, the T595's ergonomics promote a comfortable riding posture, with slightly raised handlebars and a well-contoured seat. However, long-distance comfort may be compromised compared to touring bikes, which is typical for the class.
